

# 1<sup>st</sup> Announcement for

# JSSB 2023

**Japan-Korea Joint Symposium on Sustainable Bridges 2023**

**June 18-21, 2023 Kyoto University, Kyoto, Japan**

<http://infra.kuciv.kyoto-u.ac.jp/jssb2023/index.html>

## Purpose

To promote theories and technologies to design, manage, and maintain bridge structures by

- Advance international cooperation
- Stimulate research, development, and application
- Disseminate and exchange the information
- Encourage education

## Themes

- Novel bridge construction technology
- Novel management and maintenance technology
- Structural health monitoring and inspection of bridges
- Reliability analysis of bridge structures
- Reliability-based optimal design of bridge structures
- Life-cycle performance & optimization of bridge structures
- Seismic performance of bridge structures
- Engineering risk analysis & decision under uncertainty

## Program

- June 18<sup>th</sup>, 2023: Welcome reception
- June 19<sup>th</sup>, 2023: Symposium
- June 20<sup>th</sup> – 21<sup>st</sup>, 2023: Technical Tour

## Venue

Yoshida Campus, Kyoto University, Kyoto, Japan

## Registration

- Regular (includes lunch and dinner on June 19<sup>th</sup>, and technical tour):  
70,000 JPY for Japanese participants  
50,000 JPY for Korean participants
- Students (includes lunch on June 19<sup>th</sup>): 50,000 JPY
- Accompanying person: 30,000 JPY

## Contact

**Prof. Chul-Woo Kim (Symposium chair)**
